OUR PROPOSAL

HOLISTIC APPROACH

We stand out for addressing the needs of our clients with an integrative approach, considering multiple actors and aspects involved in every stage of our services, this being supported by the specialized knowledge and experience of our team in project development, construction and operation.

SPECIALIZED KNOWLEDGE

We are representatives of The Natural Power Consultants, a United Kingdom based company recognized by a team of +500 engineers and important global presence. Aside our local specialist team, we have a +20GW quantifiable experience in renewable power generation projects, in Chile and Latin America.

RELIABLE OPERATIONS

Our operations team and local network of collaborators throughout Chile, Brasil and Peru, is capable of extending the scope of our proposal to the most remote places in the territory, thereby connecting hard-to-reach places with our main office located in Valparaíso, proving to be a safe and reliable solution to our clients.

OUR COMMITMENT

ENVIRONMENT

CLIENTS

BEST PRACTICE

SERVICE AREAS

MEASUREMENT CAMPAIGNS

We know of the importance of measuring extensively and well:

- ▶ ZX300 Lidar sale and lease
- ▶ Measurement campaign design
- ▶ Data management
- ▶ ZX300 station operation and Maintenance
- ▶ Methanol fuel cell systems

INSPECTIONS

We provide an independent approach on site:

- ▶ Metmasts bankable quality verification (VCB)
- ▶ Due diligence inspections
- ▶ End of warranty inspections
- ▶ External and internal blade inspection

STUDIES AND ANALYSIS DURING PROJECT DEVELOPMENT

We seek success in the early stages:

- ▶ Energy yield assessment
- ▶ Site classification study
- ▶ Feasibility analysis

STUDIES FOR OPERATIONAL STAGE

We make operating projects more efficient and profitable:

- ▶ Owner's engineer
- ▶ Technical due diligence
- ▶ Operational data analysis

EXPERTS IN MEASUREMENT

We accumulate almost two decades of experience in designing and managing resource measurement campaigns, and in the provision and operation of wind and solar measurement stations.

We use cutting-edge technology to measure wind and solar resource.

We guarantee continuous measurement and station monitoring.

vuWind
We manage data from metmasts and remote wind and solar stations.
